

Ato Supriyanto

WordPress Developer

Bandung, Indonesia · ipeyato@gmail.com · ipeyato-github-io.pages.dev · github.com/ipeyato

PROFILE

I'm a WordPress developer with 8+ years of experience building custom themes, page-builder websites and complex integrations for corporate clients, from multilingual enterprise migrations to booking systems connected to ERPs.

After graduating from Unikom University, I joined Malayeka Digital Solution, working on WordPress and e-commerce projects for clients in the US and Indonesia. Today I'm a WordPress developer at CLLOH, where I work on enterprise projects such as Drupal-to-WordPress migrations, multilingual sites and custom integrations.

SKILLS

WordPress & PHP Elementor & Bricks Builder ACF Flexible Content Figma to WordPress Google Tag Manager
WPML (multilingual) JavaScript & GSAP WP-CLI & Playwright

EXPERIENCE

WordPress Developer · CLLOH

Oct 2021 - Present

Singapore (remote from Bandung)

- Migrated ~170 multilingual landing pages for Allied Telesis from Drupal to Bricks Builder with WPML country/language routing, and built the migration tooling and automated visual QA behind it
- Built a custom multi-step Elementor booking widget for StoreFriendly with live Odoo API data, an interactive SVG floor plan for unit selection and PDF quotations (dompdf)
- Built custom themes, Elementor widgets and interactive homepages (GSAP, p5.js, Matter.js) for client websites
- Maintain and improve client WordPress sites, including plugin updates, debugging and deployments with WP-CLI

Front End Developer · Label Ideas

Oct 2020 - Sep 2021

Indonesia

- Built the bilingual (EN/ID) corporate website for PT ESSA Industries Indonesia Tbk on a custom WordPress theme, including investor relations, governance and sustainability sections
- Developed and maintained client websites using HTML, CSS, JavaScript and PHP
- Created custom WordPress themes and added the code and plugins needed to match the final design and functionality

Freelance WordPress Developer · Technolyze

Jun 2020 - Nov 2020

Greater Jakarta Area, Indonesia

- Built modular page systems with ACF Flexible Content on Underscores-based themes, so admins could assemble pages from pre-built sections without breaking the design
- Converted a pet resort website to WordPress, including a custom booking form with blackout dates
- Built a product sale page with pricing tabs and images and options that change with the selected product

Bandung, Indonesia

- Worked on WordPress and e-commerce projects for US clients through a partner agency, communicating with clients directly on a daily basis
- Maintained and extended a BigCommerce store for an office furniture retailer: city landing pages, clearance campaign pages, promotional popups, responsive product grids and product content updates
- Cleaned up hacked WordPress sites, migrated sites to new servers and updated licensed themes
- Worked with a wide range of themes and plugins, including WooCommerce, Elementor, Divi, WPBakery, Gravity Forms and ACF

SELECTED PROJECTS

Allied Telesis

alliedtelesis.com

Migration of a global networking company's website from Drupal to WordPress. I rebuilt ~170 multilingual landing pages in Bricks Builder with country and language routing, built interactive tools such as a network calculator, Wi-Fi planner and product selector, and wrote the tooling that converted Drupal layouts into Bricks and checked every page visually.

Bricks Builder · WPML · PHP · WP-CLI · Playwright

StoreFriendly

storefriendly.com.sg/booking

A five-step online booking flow for a self-storage company, built as a custom Elementor widget. Availability and pricing come live from Odoo through its API, customers pick their exact unit on an interactive floor plan they can drag and zoom, and the final step generates a PDF quotation.

Elementor · PHP · JavaScript · SVG · Odoo API · dompdf

ESSA

essa.id

Bilingual (English and Indonesian) corporate website for PT ESSA Industries Indonesia Tbk, a publicly listed energy company. Built on a custom WordPress theme with sections for investor relations, corporate governance, sustainability and news.

WordPress · PHP · JavaScript · CSS

Lien Collaborative for Palliative Care

liencollab.org

An interactive homepage where visitors scroll horizontally and vertically through the story, ending in physics-based elements they can drag around. Built with GSAP, p5.js and Matter.js on top of an Elementor site.

Elementor · GSAP · p5.js · Matter.js

OTHER PROJECTS

Scarlet Mela Festival

Pixel-perfect build of an event website's design with custom Elementor widgets.

Elementor · WordPress · CSS

databook

Custom theme with a modular page system built on ACF Flexible Content, so the team can build new pages from pre-built sections.

ACF Flexible Content · Underscores · WordPress

deepsee

Custom theme built on Underscores with ACF Flexible Content sections, so marketing pages can be put together from pre-built blocks.

ACF Flexible Content · Underscores · WordPress

iphca

Custom theme with a modular page system built on ACF Flexible Content, letting admins assemble pages from pre-built sections while keeping the design consistent.

ACF Flexible Content · Underscores · WordPress

mondemart

Front-end integration for a Laravel-based e-commerce website.

Laravel · HTML · CSS · JavaScript

Office Furniture Online

Ongoing work on a US office furniture retailer's BigCommerce store, including city landing pages, clearance campaign pages, promotional popups and responsive product grids.

BigCommerce · HTML · CSS · JavaScript
